REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the overall claimed combination of a filtering face mask comprising a mask body that is adapted to fit over the nose and mouth of a wearer; and an exhalation valve that is attached to the mask body, the exhalation valve comprising: a valve seat that comprises a seal surface; a flap retaining surface; and a single flexible flap that has a stationary portion and only one free portion and a peripheral edge that includes a stationary segment and a free segment; and a valve cover that is disposed over the valve seat and that comprises a surface that mechanically holds the flexible flap against the flap retaining surface, is neither anticipated nor rendered obvious by the prior art of record. The prior art combination to Simpson and Shindel while teaching the advantage of having a valve cover the mechanically holds a flexible flap against a flap retaining surface would require the valve seat to also include a projecting boss (as taught by Shindel) the projecting boss having a valve seat on one surface and a flap retaining surface completely surrounding the valve seat against which the cover holds a portion of the valve flap. Simpson lacks a projecting boss, except for applicant's disclosure, it would not have been obvious to modify it to have such a boss to provide a flap retaining surface as required by the claims of the instant application.

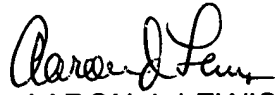

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
